PORTFOLIO

[GitHub link ↗](#)

PROJECTS

[Weather Forecast Application ↗](#)
Sep 2025

Developed a weather forecast application with a user-friendly interface, enabling users to check real-time weather and forecasts for specific locations. I implemented asynchronous API requests to retrieve weather data and dynamically update the DOM to display current conditions and future forecasts. The application was designed with a focus on responsiveness and seamless user experience, ensuring accessibility across various devices. I utilized JavaScript for efficient data handling and interaction, enhancing the overall functionality and interactivity of the application.

[Personal Portfolio Website ↗](#)
Aug 2025

Developed a personal portfolio website using HTML and CSS to professionally showcase my skills, projects, achievements, and contact information. The design was clean and responsive, ensuring a seamless user experience across various devices and screen sizes. I demonstrated strong front-end development skills by creating a visually appealing and well-structured layout that enhances my professional online presence. Additionally, I implemented effective navigation and UI elements to improve user interaction and accessibility for potential clients and employers.

[Student Registration List ↗](#)

Aug 2025

A student registration system where students can register their details, such as name, class, address, and contact number. Additionally, it provides functionalities for editing and deleting records. Student_Registration_list-

SKILLS

- HTML
- Node.js
- Data Structures
- MongoDB
- CSS
- Redux
- APIs
- Express.js
- JavaScript
- React
- Tailwind CSS

ADDITIONAL DETAILS

- All rounder, Achieve a certificate of MongoDB in BCA
- All rounder in school
- Always ready to take challenges and I'm a quick learner

Restraunt website

Feb 2023 - Apr 2023
